Applicant: Pinori et al.

Appl. No.: 10/541,795

International Filing Date: January 7, 2004

Title: HYDROXAMIC ACID DERIVATIVES HAVING ANTI-INFLAMMATORY ACTION

Attorney Docket No.: 622-84

Pub. No.: US 2006/0100285 A1

Pub. Date: May 11, 2006

This is a decision on the request for a corrected patent application publication under 37 CFR 1.221(b), received on July 14, 2006, for the above-identified application

The request is DISMISSED.

Applicant requests that the application be republished because the patent application publication contains material errors in the chemical formula in the abstract and claim 18.

37 CFR 1.221 (b) is applicable "only when the Office makes a material mistake which is apparent from Office records.... Any request for a corrected publication or revised patent application publication other than provided as provided in paragraph (a) of this section must be filed within two months from the date of the patent application publication. This period is not extendable." A material mistake must affect the public's ability to appreciate the technical disclosure of the patent application publication, to determine the scope of the patent application publication, or to determine the scope of the provisional rights that an applicant may seek to enforce upon issuance of a patent.<sup>1</sup>

The request for corrected publication received on July 14, 2006, was not timely filed under 37 CFR 1.221(b).

The applicant is advised that a "request for republication of an application previously published" may be filed under 37 CFR 1.221 (a). Such a request for republication "must include a copy of the application compliance with the Office's electronic filing system requirements and be accompanied by the publication fee set forth in § 1.18 (d) and the processing fee set forth in § 1.17 (i)." If the request for republication does not comply with the electronic filing system
